

MOHD KAIF KHAN

Python Developer | Django | REST APIs | Full Stack (React.js)

Greater Noida, India | +91-6387636498 | Kaifkhan786mantri@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

PROFESSIONAL SUMMARY

Python developer with hands-on experience building web applications using Django, REST APIs, MySQL, and React.js, plus a computer-vision project applying OpenCV and Dlib to real-time facial analysis. Comfortable across the stack: designing backend logic, integrating APIs, and building responsive front-end interfaces. Completed a 3-month web development internship applying HTML, CSS, JavaScript, React.js, and Git/GitHub in a team setting. Currently completing an MCA (CGPA 8.20/10), seeking a Software Developer / Python Developer role to apply and grow these skills on a product engineering team.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

Backend & Frameworks: Django, Django REST Framework (DRF), REST API design, MVC architecture, OOP

Frontend: React.js, Bootstrap, Responsive Design, JSON

Database: MySQL, CRUD operations, Schema design

Tools & Practices: Git, GitHub, VS Code, Replit, Debugging, Exception Handling, File Handling, Problem Solving

Computer Vision (applied): OpenCV, Dlib, NumPy, Facial Landmark Detection

PROJECTS

Driver's Drowsiness Detection System — MCA Major Project

Nov 2025 – Apr 2026

Python, OpenCV, Dlib, NumPy

- Problem: Road accidents caused by driver fatigue are difficult to detect in real time without dedicated monitoring hardware or software.
- Built a real-time driver drowsiness detection system in Python using OpenCV for video capture/processing and Dlib for facial landmark detection.
- Implemented Eye Aspect Ratio (EAR) analysis on detected facial landmarks to classify eye-closure patterns and flag drowsy states.
- Challenge: balancing detection accuracy against processing speed for real-time video frames; addressed by tuning EAR thresholds and optimizing frame-by-frame landmark extraction with NumPy.
- Impact: delivered a working real-time proof-of-concept alert pipeline demonstrating an applied approach to road-safety monitoring.

Personal Portfolio Website – [Link]

React.js, Bootstrap, HTML5, CSS3, JavaScript

- Designed and built a fully responsive personal portfolio website using React.js with reusable components to showcase projects and skills.
- Independently developed and deployed the site end-to-end, managing version control with Git/GitHub.

EXPERIENCE

Web Development Intern — Internshala

- Built responsive web application interfaces using HTML, CSS, JavaScript, and React.js under project deadlines.
- Integrated REST APIs to connect frontend components with backend data, improving page functionality.
- Collaborated using Git/GitHub for version control, branching, and code review across a 3-month internship.

EDUCATION

Master of Computer Applications (MCA)

Aug 2024 – July 2026

United Institute of Management (UIM) | CGPA: 8.20 / 10

Bachelor of Computer Applications (BCA)

Jun 2021 – May 2024

United Institute of Management (UIM) | CGPA: 7.25 / 10

CERTIFICATIONS

- Web Development Certificate — Internshala
- NSDC Certificate — National Skill Development Corporation

ACHIEVEMENTS

- Designed, built, and deployed a personal portfolio website independently during the internship period.
- Developed an AI-powered, real-time Driver's Drowsiness Detection System as an MCA major project.
- Completed a 3-month Web Development internship, delivering responsive, API-integrated features.
